Yes	No	
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Section NR 216.023, Wis. Adm. Code, allows certain MS4s that have less than 1000 people residing in an urbanized area to be waived from having to obtain municipal storm water permit coverage. Do you believe that the MS4 may be eligible for this potential exemption?

Section VI: Summary of Municipal Storm Water Program Activities

Describe the programs or activities the municipality is doing or will do to comply with the requirements of the MS4 general permit. Attach additional pages if necessary.

A. Public Education and Outreach

Describe the public education and outreach program activities that the municipality will implement to comply with section 2.1 of the MS4 general permit.

Semi-annual informational articles will be inserted into the Village newsletter for the spring and fall seasons. The Village will attempt to partner with master-composter or master-gardener practitioners and give informative presentations at the participating schools about composting, raingardens, etc. Also, the Village will attempt to be included in a county wide educational effort. Finally, the Village uses stamped inlet castings which read "Dump No Waste - Drains To River" and requires developers to do the same.

B. Public Involvement and Participation

Describe the public involvement and participation program activities that the municipality will promote to comply with section 2.2 of the MS4 general permit.

The Village will continue to support the inlet-stenciling program, which has been completed by some classes, and the cub scouts to date. We will speak at neighborhood meetings that occur approximately every two years. The Village will attempt to educate residents, using the newsletter, on the reuse of compost on Village projects, and reminding them that this same compost is derived from yard waste.

C. Illicit Discharge Detection & Elimination

Describe the illicit discharge detection and elimination program authority and activities that the municipality will develop and implement to comply with section 2.3 of the MS4 general permit.

The Village will develop an inspection and record keeping program for it's detention basins and outfall points. The Village will develop a monitoring program for dry period flows from our outfalls during dry weather conditions.

D. Construction Site Pollution Control

Describe the construction site pollutant control program authority and activities that the municipality will develop and implement to comply with section 2.4 of the MS4 general permit.

The Village has codified an erosion control ordinance in Section 86.400+. Additionally, the building inspector observes if the residential sites (<1acre) are using appropriate erosion controls. Erosion control plans are required in the SWMP which must be submitted for sites > 1 acre.

E. Post-Construction Site Storm Water Management

Describe the post-construction storm water management program authority and activities that the municipality will develop and implement to comply with section 2.5 of the MS4 general permit.

The Village has codified an post construction stormwater manangement plan ordinance in Section 86.300+for all sites > 1 acre in size. All residential sites are required to submit a site specific drainage plan with elevations for Village approval. Additionally, all SWMP(s) include requirements for the responsible party to monitor the storm system if it is to remain in private ownership.

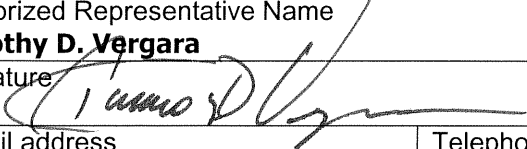

F. Pollution Prevention

Describe the pollution prevention program activities that the municipality will implement to comply with section 2.6 of the MS4 general permit.

The Village will maintain and monitor the routes and frequency of street sweeping events throughout the year. Furthermore, any catch basin cleaning is on an as-needed basis and will be formalized and will have record keeping. The Village does curbside pickup annually in the fall and has a drop-off site. This material is used in it's composting activities. Lastly, the Village will develop an inspection and record keeping program for it's detention basins and outfall points as metioned above.
